

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_6840
Title of the Manuscript:	SOME NEW RESULTS AND GENERALIZATIONS IN G-CONE METRIC FIXED POINT THEORY
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This paper deals with the existence of fixed points in what so-called G-cone metric spaces. Under some assumptions of contractive conditions in terms of variable coefficients, the authors have obtained their results with no use of the normality property of cone. As far as I know, there are only few results in the G-cone metric spaces. The reach of this manuscript is interesting. In my opinion, the manuscript can be published in its current situation.
