PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors consider in paper the eccentric digraphs of different products of graphs, cartesian, viz., lexicographic, prism, normal, etc. There are very interesting issues. I have no reservations to the scientific part. English needs some smoothing. In my opinion the paper may be improved by extension of the list of references and discussion of the novelty of the presented results comparing to the existing state of art. There are many books and papers published before 2006. Authors of this paper are almost the one who are mentioned at the list of references between 2007-2013.	
<u>Minor</u> REVISION comments	Some minor editorial errors and problems with the typesetting should be corrected 1) Introduction section, p1, line 1, there is double spacing before word which, 2) Introduction section, p1, line 6: it should be [3], [15], [22] 3) Introduction section, p1, line 13: it should be etc. before word find 4) Introduction section, p1, line 15: single spacing should be between digraphs and [13] 5) p1, line 6: it should be 6) p2, line 3: et al. should be 3 times 7) p2, line 15: there are 6 full stops, 8) p2, line 27: et al. 9) p2, line 29: It should be u. e. n. in the brackets 10) p2, line 30, <i>G</i> (in italics)
