SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The grammar is to be seriously revised. In the abstract and section 3, the author(s) made mention of the nature of equilibria and classifications of equilibria respectively, but the work seems to be silent on these crucial issues.	
<u>Minor</u> REVISION comments	It is an interesting work but there is still more room for improvement.	
<u>Optional/General</u> comments	The work may become more interesting if the author(s) can establish a general relationship between the frequency and the amplitude of the considered system.
