

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	2014_BJMCS_13866
Title of the Manuscript:	On some new nonlinear retarded integral inequalities with iterated integrals and their applications in differential-integral equations
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. On page 1, $D = [\alpha, \alpha + h]$ the constant h should be defined. 2. On page 2, line 2, $\exp(\int_0^t f(s)ds)$ should be replaced by $\exp\left(\int_0^t f(s)ds\right)$. 3. On page 2, line 4, the notation "$\alpha(t) \in t$" is wrong. 4. On page 2, line 10, the notation "$\alpha(t) \in \alpha$" is wrong. 5. Since $I = [0, \infty)$ and $n(t) \in C(I, I)$, the equation (2.31) has had a singularity point. 6. The domain of a variable t of two functions $\psi_1(t), \psi_2(t)$ is not defined in Theorem 2.5 and also in example on page 11.	
<u>Minor</u> REVISION comments		
<u>Optional/General comments</u>
