

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_14628
Title of the Manuscript:	A Mathematical Model and Simulation of Chlamydia Trachomatis in a Human carrier
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This manuscript explores the in vivo models for Chlamydia Trachomatis in a Human carrier. It has many good features including comprehensive tabulation of the models currently published in the literature. The paper is interesting, well written, and easy to read. The results are interesting and encouraging. However a closer look at the manuscript shows that it needs improvements, because the equation looks too long. Although acceptable as far as its content is concerned, the equations must be simplified in length to be fully convincing for the reader.	The equations have been reduced in the revised manuscript. See equations (32) to (39).
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
