

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2015_BJMCS_16193
Title of the Manuscript:	Genetic Algorithm Based Chaotic Search for Constrained Nonlinear Optimization Problems
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I think this paper is of value to publish in this journal. The authors introduced a local search method based on the chaotic track, and have got a significant result. My suggestions are: 1. The paper is long, and some contents in this paper such as Section 4, have little relevant to the paper. And part of these should be trimmed out. 2. I suggest that the authors give some figures to show the convergence process. I wish that this paper should be better. Thank you.	Thank you 1. I add section 4 to show that there are several chaotic maps and we choose one simple method of them where using chaos search is the new addition with genetic algorithm. 2. I will give figures to show the convergence process in the revised paper.
Minor REVISION comments		
Optional/General comments
