

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2015_BJMCS_17499
Title of the Manuscript:	ON SOME BANACH SEQUENCE SPACES DERIVED BY A NEW BAND MATRIX
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In this paper, some new type sequence spaces had been defined, investigated some properties and given matrix transformations. There are, similar to this, much paper in the mathematics literature. According to me, the idea of the paper is not original because of this type problems are discussed a lot of times in many articles. And the proofs are similar to one other. Consequently, since these type investigations fills some gaps in the of all sequence space, the proofs are true and organization of the paper is good.	In this paper, we defined new type sequence spaces which are more general than some spaces defined in the literature. As reviewer said, these type investigations fill some gaps in the literature and, our proofs and results are correct. Thanks for the reviewer's comment.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
