

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_9086
Title of the Manuscript:	ON CURVATURES OF LORENTZIAN CONCIRCULAR STRUCTURE MANIFOLDS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1.The manuscript should be revised and introduction should be written in the motivation of the paper "A. A. Shaikh and H. Kundu, On equivalency of geomeyric structures, J. Of Geometry, 2013 (the paper is available in arxiv math). The authors should study those curvature restrictions which are not equivalent and which are not already studied. The author should clearly state the reference from where the 3.5 copied, because this example has appeared in the reference "A. A. Shaikh, On Lorentzian concircular structure manifolds, J. Of Korean Math. Soc, and also many other papers of A. A. Shaikh and his co-authors. The authors should cite all the important works on the Lorentzian concircular structure manifolds, and highlight the importance of their works, such as "A. A. Shaikh A. A. Shaikh and Kanak Kanti Baishya : On concircular Structure Spacetimes, J. of Math. and Stat., Vol.1, (2005),129-132, New York, USA, 2.A. A. Shaikh and Kanak Kanti Baishya :
