

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_15452
Title of the Manuscript:	WSN: Lifetime Maximization of Rumor Routing Protocol with Optimization scheme and Bandwidth Evaluation
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. There are still a lot of comments made in the last version not be revised, for example, lots of equations are un-correct expressed. For example, line 155 equations (9) and so on. 2. It is very hard to match the system block diagram shown in Fig. 3 with the derived equations together. Especially, huge of the symbols are not known without definition. For example, Q=total signalling? 3. The authors feedback that the English is corrected, however, there are still a lot of sentences are ambiguous to understand.	1. In the edited paper, we have removed the BER analysis as it is not used in the energy and bandwidth analysis. We have focused on only network layer not on the physical layer. Accordingly paper has been modified. 2. Removed from the edited paper as justified above. 3. Definition of the symbols used in equations have been checked and added. Over and above we have made the following corrections: I have removed the grammatical error and complete the sentences in the revised paper (copy enclosed). (line of abstract - 2,3,5,6,8) , (line of article- 35,36,37,38,39,67,113,131,132,142,156,185,190,236,243)
