

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_15901
Title of the Manuscript:	Filtrations and Deductive Systems in BCL+ Algebras
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The Author mentioned that abstract is abstract. I agree with that, but abstract give us an idea about what is done in the paper. It lacks in your paper and it is little confusing. It is better if you write the last line as “Also we prove that the filtration of BCL^+ algebras is a deductive system. By conclusion I mean simply concluding the works that you have done. If there is such a conclusion it is better.	I am grateful to the anonymous referees for useful comments and suggestions. ABSTRACT The aim of this paper is to introduce the two notions of filtrations and deductive systems in BCL^+ algebras, and investigate some of their related properties. Using this, we prove that the filtration is subalgebra of BCL^+ algebras; we also prove that the filtration of BCL^+ algebras is a deductive system to the filtration of BCL^+ algebras with certain relations.
