

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2015_BJMCS_17149
Title of the Manuscript:	Architecting Network Structure for Data Center: a Scalable Hierarchical Approach
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The Research Paper is Fine now in all aspects except Abstract The ABSTRACT should be modified as follows: In first 2-3 lines just introduction to the concept being research out. Then highlight in 1-2 lines what is the aim and objective of the paper or research carried out. Then in the last 2 lines explain the results or output which is being produced out... Now modify the abstract only.	The abstract has been modified as follows. This paper presents a server centric approach for architecting data center network (DCN) by using a hierarchical model. Considering that the network infrastructure must be scalable to a large number of servers and allow for incremental expansion, we design a high scalable DCN with high performance. The results imply that our approach is more feasible, and possess the good regularity and expandability that help reduce the cost of further expansions.
