

Editorial Comments:

As the paper is already recommended for acceptance, I didn't have questions about the material. However, after a quick check about the revision, I found there are still issues that the authors didn't solve.

- 1) Equation on page 7 is broken. Only part of is shown up.
- 2) Equation on page 6, "Build C1,C2, C3" section is illegible.
- 3) There are no spaces between many words. The following list is not a complete one.
Page 2: "discernment.The"
Page 3: "BasicBelief", "(BBA).The", "(X),determines", "socialmachine"
Page 8, "learning complexity,n"
Page 10, the URL "athhttp"
Page 11, "TCMLbased", "Level.DSCML", "Betterthan","accurate in"
Page 12, "CPUtimeachievedby","timeestimated"
"canbe" "DCSML.Therefore","methods.Table 5" "forthe" "methods.This",
"demonstratesthe" "gainby" "approach to" "performancecompared"
Page 13: "Overfittingcompared", "ThisPaper"

Those are required to be correct before the paper is published.

Author's Feedback:

Authors thank the Editorial decision for acceptance the paper.

Authors accept the Editorial Comments. Issues 1, 2 are solved and equations are clear now.

Issue 3 is problem repeats, the main reason for this problem that paper in word where transfer from one computer to another this issue appears. Authors try to avoid this problem as they can. Our proof the copy of paper in PDF format to ensure that error appears in word only. Authors send the revised paper version 4 in word, PDF to prove the errors are solved.
