

Editor's Comment:

The following is a list of grammatical errors but not complete. Same problems as listed here appear more than once, the authors should check the manuscript thoroughly.

- 0) Line 36: "numerical change in time" is not accurate and not necessary.
- 1) Commas or periods are needed at the end of the equations.
- 2) Line 25: A local link was inserted.
- 3) Line 81: remove the comma after "where" and add one before respectively, "where a_{11} and a_{22} are intra-specific coefficients (competitions) of species 1 and 2, respectively."
- 4) Line 87: remove the comma after "where"
- 5) Line 88: Capital "H" at the beginning of the sentence. "effect" are countable and should be plural.
- 6) Line 95: The article "The" in "The Figure 2.1" should be removed.
- 7) Line 123-125: Symbol t is used for "cropping season" and "growing time". This is confusing to the readers.
- 8) Line 127: ". While" should be used as ", while", as "while" is a conjunction here.
- 9) Line 127: "is the residual seeds"? The sentence should be either plural or single.
- 10) Line 152-153: "steady-state(s)" should be "steady state(s)". Similar problems appear to Line 172, Line 187, Line 379, etc.
- 11) Line 163: "If ...and... but ... This", a comma is needed before "this", which should be in the lower case.
- 12) Line 170, the relation of the inequalities are not clear. First, rewrite the inequalities in the same direction would be better. The "and" used in the sentence caused some confusion.
- 13) Line 180 & 184: "exists"
- 14) Line 181: extra space is need between the comma and "we have". Similar to Line 220.
- 15) Table 2.1, why is there a comma in the second column? Between rows, a horizontal line would be helpful for the readers to check the corresponding conditions for the solution.
- 16) Line 207: "That is" should be "Those are"? These eigenvalues are so clear to readers. Maybe it is not necessary to list here.
- 17) Line 259: "The above equation" or "Equation (2.28)" instead of "The (2.28)"
- 18) Line 294: Period is need at the end of the sentence.
- 19) Line 297, Line 361, Line 362, Line 394: grammatical errors
- 20) Line 346: stagnate.
- 21) Table 3.1: For the last column, either all capitalized or all lower cases used.
