

Editor's Comment:

I have read the referees' reviews on the paper entitled "Some basic topological properties on non-Newtonian real line" submitted to "[British Journal of Mathematics & Computer Science](#)".

In order to give full knowledge to the reader, the following document on the "Non-Newtonian Calculus" should be added to the list of references.

1. Tekin, S., Balçsar, F., Certain sequence spaces over the non-Newtonian complex field, Abstr. Appl. Anal. **2013**, Article ID 739319, 11 pages, 2013.
2. İc Cakmak, A.F., Balçsar, F., Certain spaces of functions over the field of non-Newtonian complex numbers, Abstr. Appl. Anal. **2014**, Article ID 236124, 12 pages, 2014. doi:10.1155/2014/236124.
3. Çakmak, A.F., Balçsar, F., On line and double integrals in the non-Newtonian sense, AIP Conference Proceedings, **1611** (2014), 415--423.
4. İc Cakmak, A.F., Balçsar, F., Some sequence spaces and matrix transformations in multiplicative sense, TWMS J. Pure Appl. Math. **6** (1) (2015), 27--37.
5. C. T"urkmen, C. F. Balçsar, Some basic results on the sets of sequences with geometric calculus, AIP Conference Proceedings **1470** (2012), 95--98.
6. Türkmen, C., Balçsar, F., Some basic results on the geometric calculus, Commun. Fac. Sci. Univ. Ankara, Ser. A_1 **61** (2) (2012), 17--34.

Then, the paper will be OK for publishing.
