Subject: Re: Request for editorial decision for manuscript number 2014_BJMCS_15619

The issues pointed before are still here. It is not a problem due to "where transfer from one computer to another".

Similar errors show up in the revised pdf file. Below is a list but not a complete one. The authors may consider professional editing services.

Also, most issues can be detected with "spelling and grammar" check tool in word only, without reading though the manuscript.

- 1: Broken equations: for example (3) (For that equation, phi should not be used as null.)
- 2: Font of inequality sign are not inconsistent. This applies to ALL formulae.
- 3: Space between words. For example, chart on page 6.
- 4: Capitalization: For example in the first column of Table 1; in the sentence of section 3.2; "Best Machine learning" on page 6. "Cleveland heart Disease", "minimum Overfitting" on page 13.
- 5: Punctuation: For example "the matrix Whose" on page 6, "Baum E. B .and" in reference [1].
- 6: Single or plural: for example, "the two belief function."
