Compulsory REVISION comments	The work is interesting and relevant. The paper deals with a variety of interesting tasks associated with the concept of semi-topological semigroup. The main contribution of the authors is the formulation and proof of Theorem 2.4. The proof is correct and mathematically well done.	
Minor REVISION comments	I recommend the authors to make a brief comment on the possible application of main result.	I included example 2.5 to the end of the paper. This example shows an application of theorem 2.4.
