PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This manuscript still has some presentation problems. I modified some and mark them using the red colour. Please see the attach file. In addition, it is still difficult to understand the appendix. I also modified some of it and mark them using the red colour. Please similarly manipulate these modifications to revise other parts of the appendix. Or I suggest that the authors may decrease the total number of functions to be optimized. Optimizing 10 or less 10 functions is sufficient.	Thanks for a great job, dear evaluator. I made further amendments as suggested. I am very satisfied with your inputs and would not mind further research collaborations in developing this algorithm. Thanks again
