

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_19677
Title of the Manuscript:	Evolution operator of the bipartite orbit of Graphs
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The work is very interesting. Research has made thorough and have a certain scientific value. The authors construct distribution operator for orbit $\{w^k(G)\}$, where each element of $\{w^k(G)\}$ is obtained by substituting each vertex of the previous element by a graph. Some examples are presented.	
Minor REVISION comments	It would be good authors to focus more on potential future applications of the results.	CHECKED
Optional/General comments
