

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2015_BJMCS_17566
Title of the Manuscript:	A novel Comparison between the Performances of Several Invariant Moments for Printed Multi-Oriented, Multi-Scaled and Noisy Eastern Arabic Numerals Recognition
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The theme of the article is interesting and topical. The majority of figures are not readable (they are blurry or very small). Expressions $\bar{x}$ and $\bar{y}$ in figures (for example Figures 2 and 3 and next) can be written better. Some equations are not well arranged, there gaps are missing (for example equations (9), (10), (11). Incorporating of some equations in the text is missing, for example, Equation (15) does not belong to any sentence. In addition, the point is missing after the sentence after Equation (15).	
<u>Minor</u> REVISION comments	Why is the first letter in the word "novel" in the title of this paper small? Tables 1, 2, 3 are on two pages. Table on page 16 has no number and title. Equation (49) is completely unreadable. I recommend to enlarge this matrix. The gap is missing before Figure 4. Some equations in the text have not the same size, see, for example, Equation (23) and (24). In addition, the numbers of equations are not levelled.	
<u>Optional/General</u> comments
