

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_21639
Title of the Manuscript:	Max-plus Algebra and application to Matrix Operations
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Paper very well written, structured and developed. Results demonstrated clearly, and application examples. A few corrections to make. I think worthy of publication.	
<u>Minor</u> REVISION comments	Page 101: Unit Element, $\tau \otimes e = e \otimes \tau = \tau$. Missed the mark $\otimes$. Page 102, line 06: $q \otimes Y = \dots = [\psi_{ij} + q] = [\psi_{ij} \otimes q] = Y \otimes q$. Page 102, Section 3.1.3: Multiplications of matrices (...), that is, $X \otimes (Y \otimes Z) = (X \otimes Y) \otimes Z$. C is written instead of Z. To complete my observations, on several work phrases written iff instead of if. I suggest making a general rereading.	$\tau \otimes \oplus$
<u>Optional/General</u> comments
