

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_14791
Title of the Manuscript:	A New Generalized 'Useful' R-norm Information Measure and its Properties
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In the present paper the authors define a new 'useful' R-norm information measure of type α and degree β and they characterize axiomatically. A new generalized 'useful' mean codeword length is introduced and its bounds in terms of 'useful' R-norm information measure of type α and degree β are studied. Properties of new generalized measure of information have also been studied. The paper is original and it has merit for publication.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
