SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	I suggest to the authors put separately a 'conclusion'.	
<u>Minor</u> REVISION comments	The manuscript does not use many references. It would be important to mention other manuscripts related to the topic, so that the latter's "state of the art" research of this issue and its relationship to the one developed by the authors. There are articles related to the topic of research in the Science domain International. Quote of the magazine articles and SCI group is also important to enhance the manuscript.	
<u>Optional/General</u> comments	The work is well structured and its development, the principle is correct. I suggest to the authors put separately a 'conclusion'. Many of the researchers who are reading the manuscript will look for this part, I believe. No corrections were indicated directly in the manuscript text.
