

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

|                          |                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Mathematics &amp; Computer Science</a>                        |
| Manuscript Number:       | 2015_BJMCS_16079                                                                             |
| Title of the Manuscript: | Some New Oscillation Theorems for Second Order Difference Equations with Mixed Neutral Terms |
| Type of the Article      | Original Research Article                                                                    |

**PART 2:**

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Authors' response to final evaluator's comments |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <ol style="list-style-type: none"><li>1. The authors still have not included any motivation why equations with quickly growing coefficients should be considered. At a first glance, condition (C1) is not satisfied in an autonomous case and most applied cases.</li><li>2. In Remark 4.1, the authors claimed that the results from [11,14,20,21] cannot be applied to Examples 4.1-4.3 but never explained WHY.</li><li>3. There are many grammatical mistakes, typos and inaccuracies in the manuscript, I'll only mention those in the abstract and the introduction section.<ul style="list-style-type: none"><li>- "complement" in the abstract does not need "to" after it, I believe;</li><li>- In Latex it is \max, not max</li><li>- Page 3: "criteria which imply", not "implies"</li><li>- Several spaces are missing</li><li>- Page 3, line 12: instead of "that when" should be ": when" or "whether".</li><li>- In Lemma 2.3, line 1: should be ``that satisfies" or "satisfying"</li><li>- Lemma 2.2: a more detailed reference to [10] (chapter, page) is required.</li></ul></li></ol> |                                                 |

**Reviewer Details:**
