

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	MS: 2012/BJMMR/2065
Title of the Manuscript:	A HISTOLOGICAL STUDY OF THE HEPATIC AND RENAL EFFECTS OF SUBCHRONIC, LOW DOSE ORAL MONOSODIUM GLUTAMATE IN SWISS ALBINO MICE.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The discussion still failed to link change in body weight as well as liver and kidney weight with the histological observation.	In the discussion I mentioned that the increases seen in the liver and kidney weight could be attributed to inflammation and oedema and this is consistent with the liver and kidney histopathology that showed an increase in inflammatory cell component, I have tried as best possible to link them and I hope this is okay by you , Thank you sir for your time and commitment to quality.
