Subject: Re: Request for final decision for manuscript number 2012 BJMMR 2685

There seem to be minor corrections necessary for the orthography. But overall, this is an interesting study, well presented after the corrections according to the reviewers' comments. It shows the necessity of a better teaching of this part of the Nigerian population. Only aspect that might be bothering is that the study was performed some time ago, and I do not know if the status of the population described is still current. Nevertheless it may be reflecting similar problems in similar countries and therefore merits publication.
