**SDI Review Form 1.6**

**PART 2: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments	<p><b>Review the English</b>            Change biometric parameter for: testicular weight and volume            Abstract: For correlations is better to write the coefficient, because the p value is not so important.            Introduction: smoking is a source of Cd, it would be of interest to add some information about this exposure            Methods (line 58) What is Warri?            Results: Table 1 is not self-explained, please modify the structure            Discussion:            More comments are needed, why if the problem is also at hypothalamic level, there are some reports mentioning it.</p>	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
