

SDI Review Form 1.6

PART 1:

Journal Name:	<u>British Journal of Medicine and Medical Research</u>
Manuscript Number:	2013 BJMMR_4217
Title of the Manuscript:	Antinociceptive effects of ethanolic extract of Hybanthus enneaspermus leaf in male albino rats
Type of the Article	Research paper

General guideline for Peer Review process is available in this link:

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>This manuscript was intended to investigate the Antinociceptive effect of ethanolic extract of <i>Hybanthus enneaspermus</i> leaf (EEHE) in rats by using tail flick and formalin tests. The results showed that EEHE (500 mg/kg and 1000 mg/kg) significantly reduced the paw licking time and significantly increased the tail flick latency. This manuscript is a preliminary study and should not be acceptable. Specific comments are addressed as follows:</p> <ol style="list-style-type: none"> 1. The method of formalin test is different from the method described in many articles. The results of formalin test (Figure 1 and Figure 2) are different from that described in the method of formalin test section. 2. Table 1: <ol style="list-style-type: none"> (1) The duration (sec) of AMP before treatment is lower than the control group. Why? (2) Is there any significant difference between control and AMP groups after treatment? 	

SDI Review Form 1.6

Minor REVISION comments	(1) The number and unit should give a space in the manuscript. (2) The grammar of some sentences need to be revised.	
Optional/General comments	There are many speculations in the abstract and discussion.
