SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors have evaluated histopathology and inflammatory effects of Curcumin after feeding OB/OB mice with 180 mg daily for 2 month and reported a significant decrease in the liver fat as well as decrease in cytokines such as adiponectin and TNF-α. The manuscript has been written in good English. The introduction, material & Methods and discussions are presented in concise and good manner. The graphs show well the significance and acceptable. The 10 treatment mice were fed pellets	Authors improved document to read, (the 10 treated mice were fed...) as requested. A statement of statistical analysis was added as requested
<u>Minor</u> REVISION comments	There are some minor grammatical mistakes that should be corrected such as: "The 10 treatment mice were fed..." should be corrected to "The 10 treated mice were fed..." There should be an statement for Statistical Analysis at the of the Material and Methods to show how they analysed the data.	
<u>Optional/General</u> comments
