

SDI Review Form 1.6

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	2013_BJMMR_8559
Title of the Manuscript:	Hepatic Antioxidant Effect of Paroxetine in Rats Exposed to Chronic Restraint Model
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ol style="list-style-type: none"> 1. The discussion regarding HPA axis is not necessary. 2. Please explain more clearly the reasons why you could say that protection of livers resulted from an anti-oxidant action. 	<ol style="list-style-type: none"> 1- I removed the paragraph related to HPA axis 2- According to ref: [22]: Chronic paroxetine administration to stressed adult rats would produce its protective effects against apoptosis and oxidative stress in their hippocampus. The authors of this study assumed that the anti-oxidant effect , after exclusion of other factors as neurotransmitters, played an important role to protect hippocampus from free radicals and its damaging effect. So, I also suggested , in the light of the results and depending on assumption of ref [22] that the anti-oxidant actions of paroxetine would be “partially” protective factors against damaging effects of CMS.I added the word “ partially”
<u>Minor</u> REVISION comments	<ol style="list-style-type: none"> 1. Try not to use abbreviations in the abstract. 2. Abbreviations should be spelled out when they first appear. 	<ol style="list-style-type: none"> 1- I removed abbreviations from abstract 2- I spelled every abbreviation when they first appear as recommended
<u>Optional/General</u> comments
