Subject: RE: Request for final decision for manuscript number 2013\_BJMMR\_7832

I evaluated the manuscript and the revised version after the reviewers' comments. The authors (Mohemid M. Al-Jebouri and Nuha M. Wahid) have not completed the reviewer's comments and suggestions in the revised version of the manuscript. Particularly, they need to complete comments of the reviewer, Camilla Tincati who suggested a few minor corrections in the first line of the result section and in Table 1, e.g. "Also correct age range in table 1: 7-30 while in text the younger age group is 1-30".

After finishing those minor corrections, I would found that the manuscript entitled originally " Utilization of QuantiFERON-TB Gold In-Tube for TB Diagnosis with Reference to other Immunological Tests of Iraqi Patients" (changed in the revised version as "An Evaluation of QuantiFERON-TB Gold In-Tube and Immunological Tests for TB Diagnosis in Iraqi Patients") is suitable as a publication in its category in the journal. So, please proceed for the publication process of the manuscript as an accepted one.

This is my final editorial decision for the manuscript.
