SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript provided compelling evidence that curcumin would reduce both hepatic steatosis and inflammation in the OB/OB mouse model. This manuscript elucidated that liver fat appeared reduced in OB/OB mice after treatment with curcumin. The study is clear, well conducted and the results support the conclusions. The methods and data described in this paper were appropriate and correct.	
Minor REVISION comments	Needs some language corrections before being published	
<u>Optional/General</u> comments
