

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	2014_BJMMR_15959
Title of the Manuscript:	Epidemiology of Coccidian Parasites in HIV Patients of Northern Uganda
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR’S comments on revised paper (if any)	Authors’ response to final evaluator’s comments
<p><b>ABSTRACT.</b>            The first sentence of the result and discussion section of the abstract is complicated. Logically and grammatically, there is a disconnect between the segment i highlighted ( “...in females 2.7% compared to 0.9% in males”) and the preceding segment. Which specie of <i>Cryptosporidium</i> did you identify?</p> <p><b>INTRODUCTION.</b>            Line 26. “A recent in Kenya...” Please check meaning. A recent what?            Line 38. Do you mean sub-sahara?            Line 40. “gastro intestinal” or gastrointestinal.</p> <p><b>METHODS</b>            Lines 92 and 93.On line 92 you mentioned “children, middle age and adult” while on line 93 you wrote “children, adults and elderly”. Ensure consistency!</p> <p><b>RESULT</b>            159 to 166 should not be included because the findings are not part of the aims of the study. Table 5 is not necessary.</p> <p><b>DISCUSSION</b>            Lines 188 and 189: generic name of an organism should start with capital letter.eg <i>Cryptosporidium</i> . Incidental findings should not be discussed as done on line 192.Rewrite lines 192 to 203.You did not exhaustively discuss your result .Compare and contrast your findings with that of previous researchers.</p>	<p>Corrected</p> <p>Corrected</p> <p>Rectified</p> <p>Incidental findings have been retained as advised by other reviewers but their analysis and discussion has been removed,</p> <p>Corrected</p> <p>Thank you</p>
