

Editor's Comment:

I feel this is an interesting study, the authors demonstrated that a lower dose of follitropin-alpha is as effective as a higher one for the treatment of infertility. They have made all changes according three reviewers' suggestions.

I will suggest to accept it for publication after minor changes:

1. One 37,5 (page 3) need to be changed to 37.5.
2. English writing need to be edited, for example: "7(7.5%) and 4(4.1%)", there should have a space between number and parenthesis.
