

Editorial comments:

The authors did not understand my comments exactly. They still need to delete some statements in the manuscript. I highlighted the statements with red colour, in the manuscript. One statement is in the abstract section and the other one is in the methods section. Those highlighted words in red colour should be deleted. Also the authors need to make a statement about the ethics approval for using patients' clinical data to present in the manuscript.

Editor's Details:

E. Umit BAGRIACIK
