

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	MS: 2012 BJPR 2172
Manuscript Number:	British Journal of Pharmaceutical Research
Title of the Manuscript:	Combined oral arginine and monosodium glutamate exposure induces adverse response on the prostate and testis of rats.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have replies to my critiques, although not satisfactorily, and stated that additional studies are needed to determine whether the results they present are reliable or not reliable.	We sincerely thank you very much Prof. for your valuable comments. We do humbly expunge the clauses "and to validate reliability" in Line 16 and "validate reliability" in Line 256.,
