SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	MS: 2012 BJPR 2172
Manuscript Number:	British Journal of Pharmaceutical Research
Title of the Manuscript:	Combined oral arginine and monosodium glutamate exposure induces adverse response on the prostate and testis of rats.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In this manuscript, effects of different concentrations of GLU. ARG or MSG on the prostate	
and testis of rats should be investigated. Meantime, the data is not enough to evaluate the	
effects of the prostate and testis of rats. More deeply study results should be added to support	
the conclusion.
