

Stage 4: Receipt of revised paper version 2 and author's feedback	Shehla Unaiza Hridi	7 <sup>th</sup> Jun'13					Complete
Stage 5: Final evaluation by Editor/Associate editor/Chief editor	Dr.Vasudevan Mani, Brain Research Laboratory, Level 11, Block FF1, Faculty of Pharmacy, Universiti Teknologi MARA (UiTM), Campus Puncak Alam, 42300 Bandar Puncak Alam, Kuala Selangor, Selangor, MALAYSIA	<b>Reject</b>  Based on reviewer comments two important points have not answered by Authors. <b>1. Acute toxicity</b> – the answer is not scientific. According to my opinion toxicity part is very important when using non standardized extracts. <b>2. Ethical Issue</b> – There is no information about ethical permission for using animals.  <b>Additional Issue-</b> 1. Authors need to do identification and authentication of plat from an approved botanist. 2. The plant name is not followed throughout manuscript scientifically as <i>Hiptage benghalensis</i> or <i>H. benghalensis</i> .					Complete
Stage 6: Communication of final DECISION to the author							Pending
