PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Hiptage Bengalensis is commonly used in traditional medicine, and the analgesic and anti-Inflammatory activity has never been experimentally tested. Generally, this study is interesting and important.</p> <p>About acute toxicity, it will be better if the author could perform ID₅₀ data. At least show the result of the effect of several times higher dosage than experimental dose used in the study.</p>	
Minor REVISION comments	<p>No discussion about phytochemical screening, what is the new finding in this study compared to others, like Chenthurpandy P et al, Pharmacognostical Investigation of Hiptage benghalensis, published in 2010. I can't find statistic symbols labelled in any of figures. No article title in reference 10 (page 24, line 549)</p> <p>Lots errors can be found in the text and they could cause confusing.</p> <p>Page 5 Line 102, is that 25±2 or 25±20?</p> <p>Page 5 line 114 in there refrigerator?</p> <p>Page 5 line116 103gm, Is it gram or milligram? Several other place use gm, too. If it's gram, please don't use gm.</p>
