### PART 2: Review Comments

	Reviewer's comment	<b>Author's comment</b> ( <i>if agreed with reviewer,</i> <i>correct the manuscript and highlight that part in</i> <i>the manuscript. It is mandatory that authors</i> <i>should write his/her feedback here</i> )
Compulsory REVISION comments	The manuscript evaluated the efficacy of ethanolic extract of Coccinia grandis in lowering blood glucose in diabetic animal model. The authors claimed that their paper is unique, sine it deals with ethanolic extract (that was not tested before). However, a simple search in Pubmed, shows that very similar work was done in 2007. See below. Hence, I regret to reject publishing this paper. <u>Phytomedicine.</u> 2007 Dec;14(12):792-8. Epub 2007 Aug 8. <b>Antidyslipidemic activity of</b> <b>polyprenol from Coccinia grandis</b> <b>in high-fat diet-fed hamster</b> <b>model.</b> <u>Singh G, Gupta P, Rawat P, Puri A, Bhatia G,</u> <u>Maurya R</u> .	
Minor REVISION comments
