**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The paper is fundamentally centered on chemical investigation. So as it is can be published without any problem in chemistry journal or in "in silico investigation" journal. Not really in a pharmacology journal without any biological proof of the "in silico" concepts!</p> <p>Moreover the author in their rebuttal letter stated that th referncesin the paper were correct: have they verified? Some time references are cited as number and some time referring the name of the first author!</p> <p>From: Managing Editor sdi6</p>
