

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Pharmaceutical Research
Manuscript Number:	2013_BJPR_4454
Title of the Manuscript:	Phytochemical Screening and Investigation of the central and peripheral Analgesic and Anti-Inflammatory activity of ethanol extract of Hiptage Bengalensis (L) Kurz

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>It's much better than last version, but several minor things need to take care before publishing, I think the authors can fix them with the help of editors without another review.</p> <p>1, In Mice Screening part (2.6.2, line132-134), "the mice were housed in standard condition for one week after purchase", then when did the experiments start? After that week? It's not clear. I suggest showing time 'before experiment' instead of 'after purchase'.</p> <p>2, Line 186, what is "hot water containing beaker"? You mean 'water bath'?</p> <p>3, Line 103, "taken" here is hard to understand, you mean 'placed'?</p> <p>4, Conclusion should be simplified and clear. I suggest move the last sentence to line 258, before "Now our next aim....."</p> <p>It will be much better if this manuscript can be edited by a local English speaker.</p>
