SDI Review Form 1.6

Journal Name:	**British Journal of Pharmaceutical Research**
Manuscript Number:	**2013_BJPR_8495**
Title of the Manuscript:	**FORMULATION and EVALUATION of OPTIMIZED CLOTRIMAZOLE EMULGEL FORMULATIONS**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	The aim of this work was to develop an emulgel formulation of Clotrimazole using carbopol 934 or hydroxyl propyl methyl cellulose2910 as a gelling agent. The work is well written and it is interesting. But I think that some points should be clarified or improved. In the text table 2 (line 58) is before table 1 (line 83) Line 74: describe the quadratic coefficients, however β11, 22 and 33 not appears in the equations, please explain it. Table 3: Which method was used to measure homogeneity? and the consistency? please describe it. Table 5: The inhibition zone measures were in triplicate? The mm value is the average? please explain this point. Finally there are several typing error, please revise the complete manuscript.	
Optional/General comments	I recommend the publication after revision.
