

Reviewer comment Number: 6	Author comment
Sections: Introduction of this study is well defined. Materials & methods with descriptions with sufficient details. Results & discussion the authors described the results and discussion with sufficient and appropriate analyses. Conclusion supported by the data, and discussion. The references are suitable and adequate.	- Thanks a lot for your kind comments
The manuscript presents important results obtained for virucidal and bactericidal activities. I suggest for the authors one correction on abstract in the first paragraph.	Revised according to reviewer comment
