

## **SDI Review Form 1.6**

### **PART 1:**

|                          |                                                                                                  |
|--------------------------|--------------------------------------------------------------------------------------------------|
| Journal Name:            | <b>British Microbiology Research Journal</b>                                                     |
| Manuscript Number:       | <b>MS: 2012/BMRJ/2091</b>                                                                        |
| Title of the Manuscript: | <b>Antimicrobial Profile of Selected Snake Venoms and their associated enzymatic activities.</b> |

**General guideline: Reviewers are requested to follow these guidelines during review: (Note: Title of different sections as proposed below may differ in case of review paper / case reports)**

- Introduction (*Is the problem/objective of this study original, important and well defined?*)
- Materials & methods (*Kindly comment on the suitability of the methods. Sufficient details of the methods should be provided to allow peers to evaluate and/or replicate the work*)
- Results & discussion (*Kindly comment on: 1. Are the data well controlled and robust? 2. Authors should provide relevant references during discussion. 3. Discussion and conclusions should be based on actual facts and figures. Biased claims should be pointed out. 4. Are statistical analyses must for this paper? If yes, have sufficient and appropriate statistical analyses been carried out?*)
- Conclusion (*Is the conclusion supported by the data, discussed inside the manuscript? Conclusions should not be biased and should be based on the data, presented inside the manuscript only*)
- Are all the references cited relevant, adequate? Are there any other suitable current references authors need to cite?
- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

### **PART 2: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                                                                                                              | <b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part and write here 'Corrected'/ if not agreed, give suitable justifications)</i> |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>COMPULSORY REVISION</u></b> comments | <b>Sections:</b><br>Introduction of this study is well defined.<br>Materials & methods with descriptions with sufficient details.<br>Results & discussion the authors described the results and discussion with sufficient and appropriate analyses.<br>Conclusion supported by the data, and discussion.<br>The references are suitable and adequate. |                                                                                                                                                                                  |
| <b><u>Minor</u></b> REVISION comments      | The manuscript presents important results obtained for virucidal and bactericidal activities. I suggest for the authors one correction on abstract in the first paragraph.                                                                                                                                                                             |                                                                                                                                                                                  |
| <b><u>Optional/General</u></b> comments    | The manuscript presents important results obtained for virucidal and bactericidal activities.                                                                                                                                                                                                                                                          |                                                                                                                                                                                  |

**PART 8: Reviewer Details:**
