

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	2013_BMRJ_5707
Title of the Manuscript:	POTENTIAL BIOACTIVE COMPOUNDS PRODUCED BY RHODOCOCCLUS ERYTHROPOLIS VLK-12 ISOLATED FROM SOUTH COAST OF ANDHRA PRADESH, INDIA
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The title suggests of some BIOACTIVE COMPOUNDS from <i>RHODOCOCCUS ERYTHROPOLIS</i> VLK-12, however, the manuscript does not report the isolation of any class of compound and the activity reported is of the crude extract. The title should be modified accordingly. Also, the use of the word METABOLITES or COMPOUNDS should be restricted as it seems meaningless under the light of presented data of the crude extract.	Modified accordingly OPTIMIZATION OF CULTURE CONDITIONS FOR ENHANCED ANTIMICROBIAL ACTIVITY OF <i>RHODOCOCCUS ERYTHROPOLIS</i> VLK-12 ISOLATED FROM SOUTH COAST OF ANDHRA PRADESH, INDIA
<u>Minor</u> REVISION comments	There seems no difference in the 2.3 and 2.9 sub sections under the materials and methods heading. They may be merged under single sub heading.	2.3 and 2.9 sub sections are merged under single sub heading 2.8.
<u>Optional/General</u> comments	It would be good to support the authenticity of your data, if you provide a figure showing the zone of inhibition against any one test organism.	Figure showing the zone of inhibition against test bacterium included (plate-2 and 3)
