

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |                                                                                                                                                               |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Microbiology Research Journal</a>                                                                                                         |
| Manuscript Number:       | 2013_BMRJ_6619                                                                                                                                                |
| Title of the Manuscript: | In vitro antagonistic potentials against fungal plant pathogens of soil actinomycetes species from the National Park “El Chico”, a protected forest in México |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Authors' response to final evaluator's comments |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <p>It's clear that the manuscript was well improved. I have only two comments:</p> <p>- <b>Line 104: Statistical analysis:</b> You need to add the name of the computer software (Ex: STATISTICA or XLstat or SPSS ...) and which version you used; and at the end you have to write a reference for that.</p> <p>- <b>Fig 2:</b> * Use only a degradation of black color for diagrams, and you don't have to use a colored background, keep it white.</p> <p>* Instead of bars, since you analyzed data statistically, use letters (a, b, c...). Means with the same letter are not significantly different. With the software use “Homogenous group”.</p> |                                                 |

### Reviewer Details:

|                                  |                                                                                              |
