

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	2014_BMRJ_11066
Title of the Manuscript:	PLASMID BORNE RESISTANCE IN BACTERIA TO COMMON HOUSE HOLD SPICES
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	In this manuscript, the author(s) examined the antimicrobial properties of various spices and analyzed the nature of resistance. The topic is suggested to be accepted by British Microbiology Research Journal with minor revision. 1. DNA marker should be used in electrophoresis to imply the size of the plasmids extracted from bacteria. 2. All cultures should be with same clones and well spread on agar plates.	1. Since we have not concentrated on molecular weight of plasmid we have not loaded the DNA marker. Only to check the presence of the plasmid we have extracted it. 2. All cultures used are from same clones.
<u>Optional/General</u> comments
