SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The work presents great scientific merit by treating about bacterial resistance to antimicrobials, offering support for a diagnosis of possible mechanisms involved in the resistance. However, some considerations must be made: 1 - Correct abbreviations of antimicrobials according to international standards (lines 94 to 96) 2 - The info on lines 131 to 134 are not results and have been highlighted in the material and methods 3 - It is also not result. Must be in materials and methods (lines 141 and 142) 4 - Make the conclusions according to the results. Avoid recommendations.	Done The info on lines 131-134 are observations of how bacteria were isolated, hence written in the results section. Done Done
<u>Optional/General</u> comments
