SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Materials and Methods: (1)- What was the incubation temperature of Selenit F broth? (2)- Which standards methods were used for confirming salmonellae suspected colonies growing on MacConkey, DCA and CLED? References: There are a number of references that are dated (1940s, 1970s, 1980s). Perhaps the authors should replace them with most recent ones. Especially those references that were used to give figures about the incidence of salmonellae within the community.	The Authors agree with the reviewer's comments.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The data presented in this manuscript is best suited for a Short Communication article	The Authors also agree with the reviewer.
