

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Microbiology Research Journal
Manuscript Number:	2013_BMRJ_7851
Title of the Manuscript:	Molecular Characterization of hepatitis B virus circulating in asymptomatic and symptomatic carrier in Côte d'Ivoire

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
There are many spacing and English grammar errors in the whole manuscript that authors should check. In particular, - Line 5, page 2. The word "type-specific" should be substituted with the more appropriate "genotype-specific". - Line 11, page 2. "HVB" should be substituted with "HBV". - Line 6-7, page 4. The word "thirst" should be substituted with "third". Moreover, the two sentences should be rewritten in a correct form. - Line 16, page 6 (Results section). The word "Khi2" should be written in English, i.e. "Chi-squared". - Line 19, page 9 and line 14, page 10. The word "previously" should be substituted with "previous". - Line 6, page 10. "Was" should be eliminated. - Line 22, page 10. "Deases" should be substituted with "disease". Finally, in the Materials and Methods section, authors should specify why they didn't investigate on genotype G-J in their cohort of patients.	All the corrections have been done in the manuscript. About the genotypes G to J, the methodology used [Naito. 2001]could only detect genotypes A to F. Thank you for your remarks.
